

Press Release

Spigraph, Everteam & ImageFast Provide Critical Information Governance Solutions to European Market

London (UK), Paris (FR) – April 2, 2019 Spigraph, one of the leading European Value Added distributors in the capture and digital transformation market and part of Everteam Group, a leader in information governance solutions, is pleased to announce the availability of two products from the Everteam Information Governance Suite to their portfolio: **everteam.discover** and **everteam.policy**.

Organizations of all sizes and in all industries are facing increasing business and regulatory pressures related to how they manage their information. Much of this information is dark content hidden in silos across the organization including file shares, cloud-based collaboration tools such as SharePoint, Office 365 and Google Drive, as well as a range of business applications. It's critical to organize, classify and manage properly, ensuring it adheres to defined retention policies.

To support organizations in their efforts to manage their information properly, Spigraph is making two Everteam governance products available: **everteam.discover** and **everteam.policy**:

everteam.discover is a file and content analytics solution that connects to both structured and unstructured data repositories across the organization. It is a complete solution for content discovery, migration, remediation, identification of PII, PHI and PCI data, and governance.

everteam.policy is an information lifecycle and retention management solution that helps organizations quickly develop, publish and maintain enterprise-wide information and retention policies. It supports a hierarchical classification scheme, comprehensive retention rules and customizable information properties to capture your complete set of governance policies.

Spigraph is also pleased to announce ImageFast as a reseller of the Everteam Information Governance products. ImageFast is an award-winning consulting and technical services company that has been delivering information governance solutions to the insurance and finance markets for over 20 years.

Press Release

“We have on boarded ImageFast as our reseller for the Everteam Information Governance products. Their understanding of market needs, along with a strong professional services team make it the right partner to help organizations successfully implement Everteam’s governance solutions and get control of their information,” said Peter de Boer, General Manager Northern Europe and DACH, Spigraph.

Spigraph chose ImageFast to support sales of everteam.policy and everteam.discover because of their technology and digital transformation driven approach, as well as their experience with document and data capture, management, automation, measurement and integration. With their present portfolio and the now offered Everteam solutions, ImageFast has a complete product portfolio to address existing and new customers requirements.

“Our customers deal with large volumes of information and are struggling to find the best tools to help them manage it effectively. Everteam’s solutions for file and content analytics, and retention policy management can help reduce risks, decrease costs and ensure the best information is available to effective decision-making,” said Darren Edwards, Managing Director, ImageFast.

Effective information governance is critical. With fully defined and applied governance policies, you reduce risks, save money and meet privacy and data retention regulations. Unmanaged data creates risks, complexity, and cost. When you manage data with Everteam’s governance suite, including everteam.discover and everteam.policy, the right information is in the right place for the right period of time.
